

Modernization Kit ASSA ABLOY M Door leaf for overhead sectional doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in
door opening solutions

Modernize your building facade by changing the door leaf

ASSA ABLOY M Door leaf is an excellent way to reshape your facade without replacing complete door.

ASSA ABLOY M Door leaf is an ideal solution when your existing door from ASSA ABLOY Entrance System - or any other brand - is damaged, worn out or when you want to modernize or need to change the color of your entrance.

This is an excellent way of reshaping your facade to improve your image, but it will also provide you a better insulation - and therefore - help you to save energy.

A damaged or a worn out door can be a threat to the safety of your employees, vehicles and goods. By installing a new door leaf you secure the working environment of your employees and the safety of the goods.

With ASSA ABLOY M Door leaf you have great opportunities to adapt the door to your requests and demands. You have the possibility to choose from a wide range of sizes, colors, incorporated windows, pass door etc.

Our ASSA ABLOY overhead sectional doors 1042P, 542 and 242 have integrated finger pinch safety in the section joint, making these door leaves safe, secure and reliable.

A new ASSA ABLOY M Door leaf will give the same appearance as a complete new door. The installation of the new door leaf can be done within a couple of hours and we will ensure that your activity will not be disturbed.
